In 1932, Louis McGlaughlin launched what would become the gas barbecue industry by started the Chicago Combustion Company. During those early years, Louis focused on building gas burners for commercial and industrial applications. The most famous of those burners was the ARGIL. Soon he found that his burners were being adopted for commercial cooking. After moving to New York, Louis incorporated new ideas and improved on his burner by building our first successful gas-fired broiler called the BROILBURGER.

Until the mid-1950's, the gas grill business was almost exclusively found in commercial cooking. The first ever portable gas grills were sold in 1954 by Chicago Combustion Corporation. Shortly after, two other companies, Charmglo and Falcon, released competing portable grills. Based on the premise of the successful gas fired BROILBURGER, these portable gas fired barbecues featured state of the art burners. The burners were built from the lineage of burner technology that formed the basis of the Chicago Combustion Company. Other early design ideas included porcelain on steel fire boxes, electric rotisseries, and lava rocks to emulate the charcoal flavor. Don McGlaughlin, Louis' son needed a source of fuel for their new portable grill. The iconic propane bottle that we now associate with the grilling today was actually sourced from the 20-lb propane cylinders used by plumbers. In 1959 you could purchase our portable Model AP for \$131.25.

Over the next 30 years, Chicago Combustion continued to develop new models such as the Masterpiece Series which is a more "traditional" gas grill. We slowly exited the mass retail business in favor of selling handcrafted gourmet grills by our network of distributors who offer high touch sales, service and support. With this evolution, we decided it was time to rebrand the company and became LazyMan. LazyMan comes from our earliest grill line whose name was inspired by how much easier gas grilling was compared the charcoal of the time.

What sets LazyMan apart from other companies is our attention to quality and durability. Our parts are made from the absolute highest quality materials. All of our stainless steel burners, fireboxes, grates, hoods, shelves and drip pans are made in our factory in Belvidere, New Jersey. The handmade quality craftsmanship is apparent from the first day you received your product to every time you use your grill for the next 40 years. We are extremely proud to say that we stand behind every single grill we have ever made. To this day, more than 80 years since we were founded, we sell replacement parts for every product we have ever made.

- ◆ Mix and match any unit within masonry construction or within wood construction using insulation kits and spacers.

Open Hearth Series Built-Ins

The Lazy Man Model A Series Barbecues are designed to give you complete cooking control. The Model A Series Open Hearth gas broilers have Stainless Steel Type 304 construction chassis, insert pan, drip pan and cooking grates. Models feature two burners per section and are available in sizes from 17" to 68" wide. These grills ship with natural lava rock and are completely assembled.

The A1TS through A4TS Series Open Hearth gas broilers have been designed for built-in outdoor installations in masonry or other non-combustible materials - **not in wood!** Sides and back of units are subject to discoloration. TS units use 1/2" I.P.S. gas connection.

The A1TS/SS through A4TS/SS Series Open Hearth gas broilers are **NOT** been designed for use as built-ins. The front, sides and back are covered in Type 304 polished stainless steel. These units should be installed on a non-combustible surface - **not on wood.** TS/SS units use 1/2" I.P.S. gas connection.

Shown is the A4TS with 2 section Stainless Steel Hood.
